Dear GBCs, partners and sustainable building advocates,

Welcome to the WorldGBC June Global Update.

**GBC Announcement: Dodge Data World Green Building Trends Survey Launching Soon!**

This year, Dodge Data will release a 2021 World Green Building Trends report, following their 2018 report. As a GBC, encouraging input from your members gives you access to relevant market trends, and an opportunity to access market data.

It is important to have global contribution in order to achieve an accurate and useful global green building trends report.

The survey is expected to open **15 June 2021**. We will be in touch once the survey is live to discuss how best to share with your members. In the meantime if you have questions, please contact Dominika Czerwinska: dczerwinska@worldgbc.org.

**Here are the highlights from this month’s update:**

- WorldGBC launches [World Green Building Week 2021](#BuildingResilience) #BuildingResilience
- [Advancing Net Zero Status Report 2021](#)
- #BuildingLife open letter calling on the European Commission to support the full decarbonisation of the built environment

Best wishes,
Cristina Gamboa, CEO, World Green Building Council

World Green Building Week is the world’s largest campaign to accelerate sustainable buildings for everyone, everywhere.

This year’s theme will focus on #BuildingResilience for climate, people and economies.

To close the environmental, social and economic gaps and safeguard our planet for future generations, our sector must focus on #BuildingResilience.

#WGBW2021

#BuildingResilience
WorldGBC releases the **2021 Advancing Net Zero Status Report.**

Packed with net zero myth busting and stories of industry climate action, the report showcases examples of Green Building Councils, businesses and governments scaling action towards achieving WorldGBC’s vision for a decarbonised built environment.

As part of the #BuildingLife project, WorldGBC has convened a coalition of construction sector leaders to sign an open letter, calling on the European Commission to support the full decarbonisation of the built environment through ambitious policies.

The Royal Institute of British Architects (RIBA) and Architects Declare are **inviting submissions** to support a report to governments to be presented at COP26.
Deadline 9am BST on Monday 14 June 2021.

Watch the latest interview from WorldGBC’s Building Perspective series.

In our first MENA region episode, Cristina Gamboa talks with one of the youngest leaders in our network — Ala’a Abdulla, Executive Director, Jordan Green Building Council.

Ala’a shares her expertise and unique insight on becoming a leader, surviving (and thriving) through the pandemic, Jordan GBC’s affordable housing project and how to achieve good governance.

Watch the interview
**BUILUPON² Cities Series: Part 3**

WorldGBC finds out how the city of Leeds is preparing to use the BUILUPON² framework to monitor the impacts of its renovation work.

Using the framework, Leeds wants to track the impact of renovation on fuel bills, as tackling fuel poverty is a key consideration at a local and national level.

Three new companies join WorldGBC’s Net Zero Carbon Buildings Commitment.
As signatories, ARA Asset Management Limited, B+H Architects and Currie & Brown signal the growing global industry leadership to decarbonise the built environment and combat climate change.

The Commitment now has a total of 141 signatories, accounting for over 5.2 million (tCO2e) of portfolio emissions.

**CoEvolv Northern Star**

*works with, not against, the elements to tackle India’s water shortage*

---

We catch up with Mr Suhail Rahman, MD and CEO of CoEvolv Estates, about how their development is tackling the climate crisis.

CoEvolv Northern Star, is a unique sustainable residential development in India. Following water shortages in Bangalore, the development team have focused on water sustainability, and as such, won the Leadership in Sustainable Design and Performance Award ([2020 Asia Pacific Leadership in Green Building Awards](https://www.greenbuilding.com) for their innovation, making them among the highest rated green homes in India.
