# GLOBAL UPDATE

Dear GBCs, partners and sustainable building advocates,

## Welcome to the WorldGBC November Global Update.

As COP26 ends, we reflect on key highlights from the historic summit. For the first time since the Buildings Day at COP21, the 11 November 2021 was dedicated to Cities, Regions and the Built Environment – a landmark day for our global movement.

To all of you who joined us, both in person and virtually, thank you for your energy and commitment. Together, we are elevating the built environment as a critical climate solution, and our voice is being heard like never before.

However, while much was achieved, our sector must go further, faster to keep a 1.5°C future within reach. As we conclude COP26, we are already #BuildingToCOP27, which will be held in Sharm El-Sheikh, Egypt, in November 2022.

Here are the highlights from this month's update:

- [Building Ambition: the future of the built environment post COP26](#)
- A look back at COP26 and three key events
- The [26 built environment climate action initiatives](#) announced at COP26
- We launched our [Beyond the Business Case report](#)
- [44 businesses were announced as signatories](#) to WorldGBC's Net Zero Carbon Buildings Commitment tackling whole life carbon
- Green business leaders around the world call for government and industry action on buildings and infrastructure in [Beyond Buildings](#)

Best wishes,  
Cristina Gamboa, CEO, World Green Building Council

**Green business leaders around the world call for government and industry action on buildings and infrastructure in Beyond Buildings**

In October, WorldGBC published a new report, [Beyond Buildings: Why an integrated approach to buildings and infrastructure is essential for climate action and sustainability](#).

With the support of Dar Group and its member firms Integral Group, T.Y. Lin, Perkins&Will and Currie & Brown, to identify opportunities for how an integrated approach to the whole built environment is essential to deliver change commensurate with the commitments of the Paris Agreement.

[View the report](#)

On Cities, Regions and Built Environment Day, UKGBC launched the **Net Zero Whole Life Carbon Roadmap for the UK Built Environment**.

The #BuildingLife project, funded by the IKEA Foundation and Laudes Foundation, is developing an EU Whole Life Carbon Roadmap for the buildings sector, as well as 10 national Whole Life Carbon roadmaps.

As part of this project, UKGBC has convened over 70 organisations to co-create a Net Zero Whole Life Carbon Roadmap for the UK built environment. The Roadmap consists of a net zero trajectory, a set of policy recommendations, and stakeholder actions needed for the UK built environment to reach net zero by 2050.

### BBC StoryWorks: A Norwegian Powerhouse - Building A Better Future

In the latest of our BBC StoryWorks #BuildingABetterFuture series, Powerhouse Brattørkaia in Trondheim, western Norway, demonstrates how it will produce more renewable energy over its lifetime than it uses, including for its construction. Surplus renewable energy generated by the building helps to keep the city moving by providing power to the local electric bus network.
