GLOBAL UPDATE

Dear GBCs, partners and sustainable building advocates,

Welcome to the New Year and our first Global Update of 2023!

Our global network of partners and 75+ Green Building Councils (GBCs) are starting the year energised, determined, and ready to work. As we begin the year, GBCs are celebrating successes from our collective journey so far and in this edition, you can find out how four GBCs are tackling air quality.

With sustainable buildings growing in prominence in both public discourse and global climate action agendas alike; so does our shared mission to accelerate the transition to decarbonised and resilient built environments for everyone, everywhere.

But we need to go further.

The building and construction sector is still off track to halving emissions by 2030. Buildings must be a prominent part of the transition to regenerating and repairing our planet whilst creating sustainable livelihoods. But I do believe that with combined leadership and widespread collaboration we will get there.

In this month's newsletter, you can view a range of events we'll be attending, how to find us, plus a save the date for World Green Building Week 2023 (11–15 September).

I wish you all a 2023 filled with health, happiness and success. And I am excited to see what we can achieve with your ongoing support, passion and commitment!

Best wishes,
Cristina Gamboa, CEO, World Green Building Council

Air Quality Monitoring in the Built Environment: What lessons have we learnt?

In our first [#BetterPlacesForPeople](#) blog of 2023, three GBCs – [Green Building Council Italia](#), [Green Building Council Cameroon \(GBC CAM\)](#) and [Green Building Council South Africa](#) – which participated in the WorldGBC Plant a Sensor campaign, share data, stories and lessons learnt as they work to inspire the uptake of air quality monitoring around the world.

SAVE THE DATE

WORLD GREEN BUILDING WEEK 2023

World Green Building Week, 11–15 September 2023

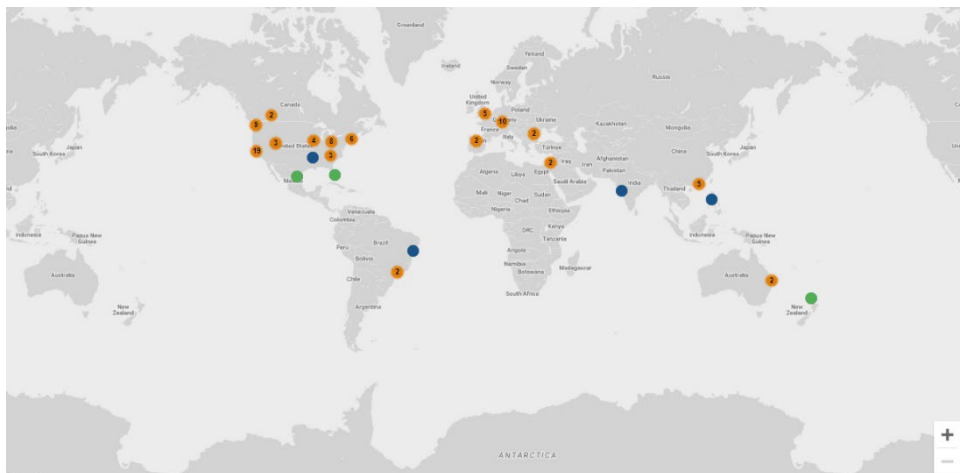

This year we will be running our annual campaign World Green Building Week on 11–15 September 2023. Stay tuned for more World Green Building Week campaign information over the coming months.

The past can teach us a lot about circularity – and not always what you expect

In our first Thought Leadership article on the World Green Building Council (WorldGBC) global [#CircularityAccelerator](#) programme, [WSP](#) share their knowledge and reflections on the circular built environment.

Find examples of global sustainable builds and projects

Our Case Study Library features examples of the world's most cutting edge sustainable buildings. Each building in the case study has demonstrated enhanced performance in relation to health benefits and net zero operational carbon, as verified by established certification schemes, rating tools or other verification systems.

NEWS FROM OUR NETWORK

GBCs AND PARTNERS

Green Building Councils

- We are proud to announce that the [Czech Green Building Council](#) (CZGBC) has joined 10 other European Green Building Councils, which are spearheading the WorldGBC project #BuildingLife, to pave the way to a carbon neutral Europe. [Read the story](#).
- To enhance cross-regional learning and collaboration, WorldGBC's Asia Pacific Network (APN) has set up an online [Knowledge Hub](#) to showcase Green Building Council and industry solutions, as well as Knowledge Partner insights, demonstrating how the APN region is accelerating sustainability and decarbonisation in the built environment.

Partners

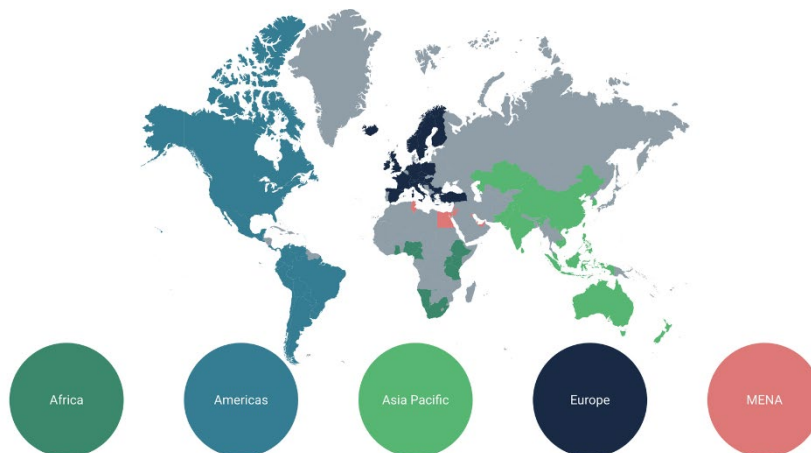

- This [new report](#) from the World Business Council for Sustainable Development (WBCSD), supported by Arup, calls on the built

environment industry to adopt a whole life-cycle approach to assessing the greenhouse gas (GHG) emissions from buildings.

Corporate Advisory Board

- City Developments Limited (CDL) joins 483 other companies as a member of the 2023 [Bloomberg Gender-Equality Index \(GEI\)](#), a modified market capitalisation-weighted index that gauges the performance of public companies committed to reporting gender-related data.
- All of [AkzoNobel's](#) locations in North America are now operating on 100% renewable electricity – helping to drive the company's ambition of reducing carbon emissions across the full value chain by 50% by 2030 (baseline 2018).
- The European Union (EU) Innovation Fund announces funding of EUR 328 million in two [Holcim decarbonisation projects](#) at the Financing Innovative Clean Tech Conference in Brussels.
